# ABOUT

Star Aluminium supplies products all around the world, with manufacturing facilities in Australia. In addition to their standard product range, Star Aluminium offers custom manufacturing solutions in aluminium, steel, and stainless steel, ensuring they can meet the unique requirements of clients across various industries.

## FOUNDED IN 1999

Star Aluminium, founded in 1999, exemplifies the values of a family-owned business, specializing in innovative work safety solutions. With a commitment to quality and expertise, it is a trusted name in workplace safety.

## OUR TEAM

With an experienced in house engineering team, to certified and experienced welders, our team is ready to take on challenging projects in any field.

## 25 YEARS OF OPERATING

With over 25 years of experience, we specialize in manufacturing customized steel and aluminium solutions tailored to client needs.

## AUSTRALIAN STANDARDS

While being certified in ISO 9001, Star Aluminium manufactures its products according to Australian Standards, ensuring safety, quality, and reliability.

# 2

## OUR 5 VALUES

We as a company, believe in upholding these 5 values is the key to our success over 25 years in the industry

### INNOVATION

We are committed to developing bespoke solutions to suit client requirements whilst maintaining quality adherence

### SAFETY

We prioritise our staff and client safety by regularly reviewing working conditions and Australian safety

### EXCELLENCE

We invest in improving and refining our processes to deliver an excellent customer experience

### TEAMWORK

We pride ourselves in prioritising mutual success in all projects both internally and with client relationships

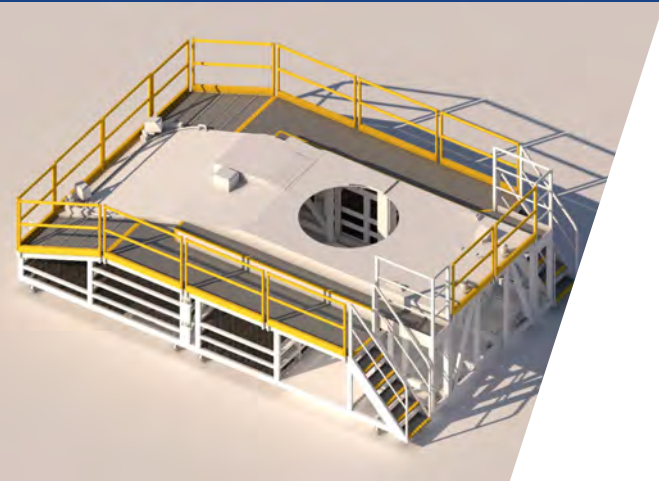

### CREDIBILITY

We strive to build credibility through providing realistic lead times, inclusive quotes and investing in staff education

# 3

## PAST DEFENCE PROJECTS

### Design of Tank Access & Maintenance Platform

The Supacat team engaged Star Aluminium for our expertise in designing aluminium safety platforms to support the maintenance and training of personnel around their vehicles. Our engineering team worked closely with Supacat to fully understand their access requirements and operational needs. The outcome was an efficient, certified engineering solution that balanced ergonomics and setup efficiency without compromising safety.

### HMAS Cerebus Engine Stand Platforms

Star Aluminium designed and manufactured engine stand platforms for HMAS Cerebus to enable navy personnel to access the engine motors with stable, elevated access. The result was a robust, reliable solution that improved efficiency, safety and access.

### Mobile Munitions Proof Gun Access Platform

Star Aluminium manufactured a durable gun access platform for IDES to facilitate routine maintenance on their weapon systems. It was engineered with safe, stable access points, guardrails, and adjustable components to accommodate various weapon configurations. The result was improved safer maintenance procedures, and streamlined access to critical components during servicing and inspections.

# AT STAR, **SAFETY** IS OUR BIGGEST PRIORITY

## **REDUCING RISK**

It is our job to produce safe products when providing solutions for our customers' unique needs.

Our highly skilled engineering team works to determine the risk factors associated with your required solution and ensures our custom solution products are manufactured to minimize all risk factors.

## **COMPLIANCE & DURABILITY**

Our highly skilled team ensures that all products conform to Australian Standards, building and/or public access codes and certifications.

## **PRODUCT TRAINING**

Star Aluminium offers training to customers on how to use all products to ensure safety risks are minimized in the workplace.

Your industry is our industry  
Your predicaments inspire our solutions.  
Your safety is of utmost importance to us.

## OUR DEFENCE CLIENTS

Star Aluminium supplies defence contractors around the country with high-strength aluminum platforms and precision fabrications, delivered on tight timelines to meet mission-critical needs.

The company emphasizes strict quality control, ISO-compliant processes, and a resilient supply chain to support nationwide defence programs and rapid replenishment across multiple sites.

Below are just a few of many loyal customers that keep returning to Star in search for their safety and fabrication needs.

- ★ Department of Defence
- ★ Rheinmetall
- ★ Supacat
- ★ RAAF
- ★ Thales
- ★ BAE Systems Australia
- ★ Boeing Australia
- ★ DSTG Port Melbourne
- ★ HMAS Cerebus
- ★ IDES

# 7

Star Aluminium delivered what they promised, timely, durable, safe and cost effective custom products. The mutual efforts from the engineers, product managers and estimators eased the whole process and produced success both on their end and ours here. I would recommend them to anyone and everyone

BERTAN - PACIFIC NATIONAL

We have been using Star Aluminium platforms for tram roof access for a few months now and they are perfect. Great quality and great service from the guys at Star Aluminium in particular Ali, who ensured what we needed was met within our limited time frame. But they did it everything from the quoting stage to manufacturing and after as been great. Really appreciate the effort guys and can't wait till our next order.

BIJAN AZMOODEH - YARRA TRAMS

Star Aluminium has supplied the Level Crossing Removal Project Caulfield to Dandenong with many height access solutions. We found ourselves in a predicament in hope that someone could assist and Ali did just that. From countless on-site inspections to various utilisation of standard and custom products we have been able to get our job done safety. Thanks guys!

JOHN MASON  
LEVEL CROSSING REMOVAL PROJECT  
CAULFIELD TO DANDENONG

Star Aluminium has supplied the Level Crossing Removal Project Caulfield to Dandenong with custom adjustable cantilever platforms for the installation of rail plinths along the Caulfield to Dandenong line-Great quality, great turn around and excellent service. I highly recommend Star Aluminium and look forward to our continued relationship.

CAULFIELD TO DANDENONG

## AFTERCARE & MAINTENANCE

All our standard products have been stamped to compliance with engineering certification provided for full OH&S compliance. Furthermore, **life time structural warranty** is issued at no additional cost.

All our products are designed and assessed to the Australian standards. Still not enough? We provide assessment renewal and product inspections as required. We recommend that all work platforms are inspected monthly to ensure there is no damage from external factors that can cause a safety issue to the user/s and those around.

Use of a damaged platform is a hazard. We recommend that you tag the platform as "out of service," call us to discuss the required repairs to bring the platform back up to code.
